

Buy, Sell and Trade

There is a new game store along Lincoln Way. They opened a few months ago and sell games, consoles, controllers, and collectables for **cheaper prices than most retail stores**. You can also sell your items for cash, get them repaired, or even trade it for something new.

Game Time

There is one more thing you can do at the game store, and that is play games on their equipment. They set up a gaming PC station. We are planning on setting up a VR system for people to play on. Keith said, who is the manager of the store. Playing on the PC they set up would cost 5\$ an hour, *which could be useful to people who dont have any video game systems*. Back to HUB: [Click Here](#)
